ODA MINT FIELD INSPECTION APPLICATION

INSTRUCTIONS:

- **Please complete the following application form for an Oregon Department of Agriculture inspection of mint fields for Verticillium wilt, as eligible under department rules (OAR 603-52).**
- **Please use one form for each field to be inspected.**
- **On the back of the form, please draw or attach a map of the areas to be inspected. If the area to be inspected is less than the entire field, indicate that portion to be inspected on the map and flag the corners of that portion of the field prior to inspection. The department will inspect the entire field if obvious flags, furrows or similar landmarks are not present.**
- **The application must be mailed to the department by June 15. If the application is late, the department may not be able to inspect the field. The fields will be surveyed during the last two weeks of July. Please notify the department by mail or by fax (503) 986-4786 if pesticides will be applied to the field just prior to or during the inspection period.**
- **The Department shall assess the established charges for such inspections (OAR 603-52). The fees have averaged approximately $9.00 per acre when applications have arrived by the due date. Charges may be significantly higher if applications are late and inspectors have to be sent back to the area.**
- **Please make a copy of this form for your records. Inspection reports and invoices will be mailed in October or upon request (503) 986-4644.**
